

Business Data Trends and 2012 List of Accredited Schools

AACSB International publishes the **Business School Data Trends and List of Accredited Schools** each year and distributes it at ICAM, to all AACSB member institutions, and at all AACSB internal and external events. This publication contains statistical information on business degree programs, educators, students, facilities, and fund raising along with details on AACSB’s membership and resources. This resource highlights trends in degrees awarded, degrees granted by field or discipline, average salaries, level of tuition support by employers for part-time and executive MBAs, sources of operating funds for business schools, and more. It also includes the annual list of AACSB-Accredited schools.
