To recognize the innovative and impactful ways AACSB member schools are redefining the face of business education, AACSB developed the Innovations That Inspire challenge.

For the 2019 Innovations That Inspire challenge, we asked member schools to identify how they are inspiring new approaches to thought leadership and increasing its impact with innovations that enable the co-creation of knowledge, as outlined in A Collective Vision for Business Education. This Innovations and Best Practices booklet shares inspiring initiatives occurring at a number of schools in the EMEA region.

As the needs of business, government, and society become more complex, business schools will be called upon to produce new curriculum, research, programs, and thought leadership that is multidisciplinary, dynamic, and impactful. This will require schools to look to new and various kinds of collaborations, including with industry practitioners and other disciplines, and to consider how thought leadership can be approached in fresh and unique ways to meet evolving business and learner demands.

Read this booklet to discover some of the ways business schools in Europe, Middle East, and Africa are approaching this call to action, or visit aacsb.edu/innovations-that-inspire.

Members can access and explore more than 750 submissions within DataDirect’s Quick Reports system.
